## SAFE ASPIRATION OF LIQUIDS

Motorized Vacuum Unit for Quick and Easy Aspiration of Liquid Waste

| Safe and Contamination-Free

| Adaptable

| Convenient

## Safe and Contamination-Free

The Safe Aspiration Station is a stand-alone motorized vacuum unit, ideal for ELISA tests, cell culture, and liquid waste disposal. The closed unit is designed to prevent contamination hazards, and all parts in contact with liquids are fully autoclavable.

The station is also equipped with a 4-liter Polypropylene (PP) bottle, a level detection system to prevent liquid overflow, and an in-line hydrophobic filter that traps aerosols for safe disposal of contaminated or hazardous liquids.

## Adaptable

Different adapters provided with the Safe Aspiration Kit can be fitted to the hand operator. The station also ensures an adjustable aspiration level indicated by a board of LEDs.

The choice of the adapter and the easy setting of the vacuum level enable quick and accurate aspiration of liquids from a variety of vessels.

## Convenient

Associated with the Safe Aspiration Kit, the Safe Aspiration Station is easy to use on a bench or in laminar flow cabinets. The unit is always ready to use, simply press the button of the aspiration hand operator to aspirate.

The ergonomic hand operator can be stored on the bottle handle. The Safe Aspiration Kit also contains a stand with storing gaps for the adapters and the hand operator to help your workspace remain clean and organized.
